From the New World came idiomatic jazz and Latin timbres and figurations (most of the dance music); a fluid and constant change from word to music and from scene to scene, such as the second-act ballet that goes from accompanied spoken word into song, into dance and back again; and most important, the kinetic approach to the stage—communication through choreographic music—delineated, in concentrated form, by these Symphonic Dances. It was almost predictable from this trend that when West Side Story hit Broadway like a bombshell, in September, 1957, it would be hailed as a landmark in American theater. Elements from the European and American musical stage traditions were fused into an original art form that is neither opera nor musical comedy. From the Old World tradition came complicated vocal ensembles, such as the Quintet in Act I: the use of music to project the story line forward (as in the duet A Boy Like That); the dramatic device of leitmotifs—for instance, the one associated with the reality of gang violence, as in the Prologue, or the one associated with the diametrically deductive-inductive species of developing musical materials, by basing much of the West Side Story score on transformations of the tritone interval, or by immediately developing the opening statement of any given song with melodic or rhythmic variation.
